

BRIS

TIDES ?

Future – what could this topic cover?

What did we hear in the young person's film about the future

Anthropocene - A geological age that is the first time the planet is impacted by humans
.... Previous ages have been like ice ages.

The biggest news story is the **environment** – is this the case? What are most news stories about

An age of **more water** around us but less of it is drinkable?

Buildings for the future

Lunar or tidal **energy**

Lack of interest in natural events like tides or the seasons – no love for the tides

Obsession with **technology** rather than nature

Proxi and Perri Bench Mark Scores

Theme	Proxi and Perri Benchmark Score out of 10	How can we raise the score?
Heritage	9	?
Water	4	?
Biodiversity	6	?
Energy	9	?
Hydro-poetics	5	?
Future	7.5	?

To raise the scores for love of tides in the future we need to take action now that will make the future better

How do we see the future – Can you vision it?

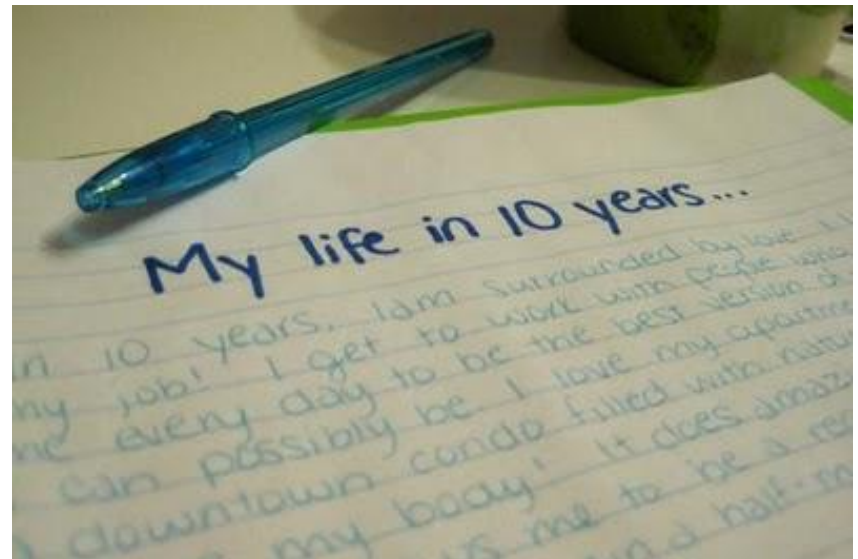

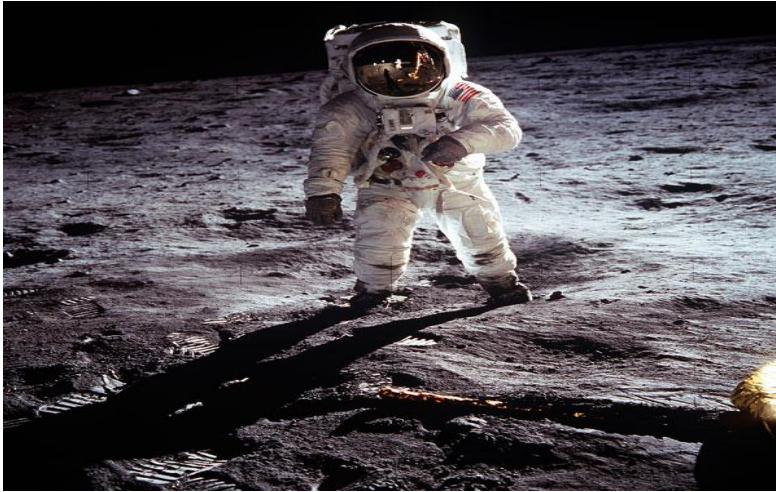

What is a Vision?

A clear and specific view of the future

Examples of Visions

Visioning

Thinking about your ideal future and being willing to turn this vision into reality.....

Your Community in the Future

What will the future look like?

Your Community in the Future

What will we eat?
How will we travel?
How will we shop?
How will we work?
Where will we live?
Where will we get our energy?
How will we take care of our environment?
How will we spend our free time?

Your Vision

Using the idea of looking through a smart phone that can see into the Future.

Illustrate how you think your positive and happy future could look.....

What will people be doing or saying?

Your Vision

- Biodiversity
- Heritage
- Water
- Energy
- Hydropoetics –
the arts

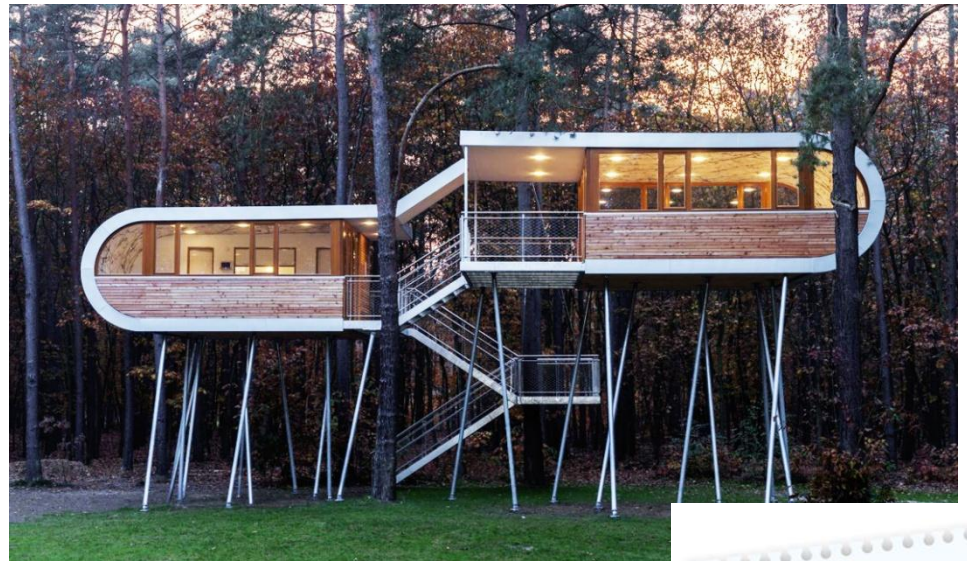

What will people be doing or saying?

A large geodesic dome structure, likely the Biosphere 2, is the central focus of the image. The dome is composed of a complex network of white, interconnected panels forming a spherical shape. It is supported by a series of tall, dark, vertical poles. In the background, a river flows through a lush, green forest. The sky is overcast and grey. The text is overlaid in a bold, red, sans-serif font, centered on the image.

**What we saw
when we
'face-timed'
the future**

Future Vision— Buildings that are safe in the wet season

Buildings where animals and humans can live side by side

All actions have consequences

- Small actions now will have an impact in the future
- Eat an elephant with a small spoon and start eating it early

What actions taken now will help make your vision happen in the future ?

The challenge is come up with an idea that you, your family, team or class or school can do that will make a difference

It could be a campaign to raise awareness –

It could be an action that changes something - to improve biodiversity , water, use or energy or how we value our heritage

It could be a display of pictures poems

Or pledges from parents to change behaviours or visit places

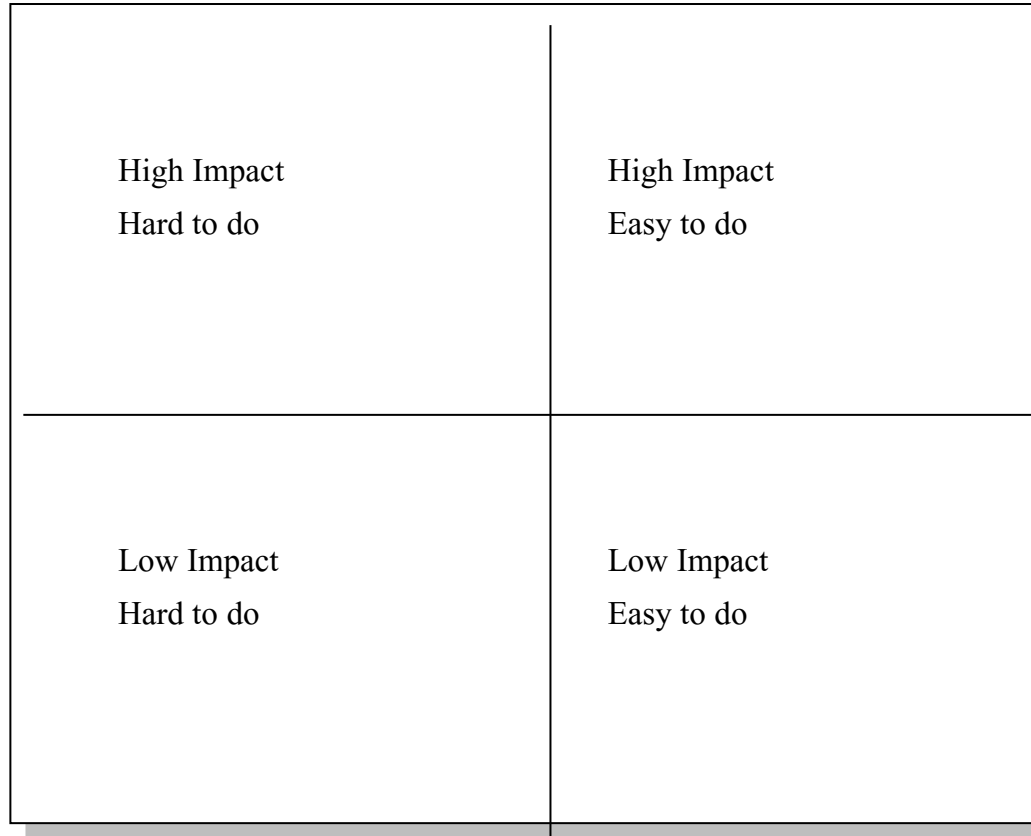

It could be individual actions that are added up to reach a target

What will make the most difference?

Place your ideas on to this grid

HIGH IMPACT ON
RAISING THE
SCORE

Impact on the Love Tides Score?

LOW IMPACT ON
RAISING THE
SCORE

Hard to do

Hard or Easy to do?

Easy to do

Agree some actions using N/3

Voting to decide which ideas we will actually do involves understanding an idea before dismissing it.

Add up the ideas - Divide the number of ideas by three - Everyone involved gets that number of votes (N/3) – use counters of some sort

Everyone votes using only one vote on one idea

The ideas with the least score are given the chance to pitch and persuade to stay on the list

Ideas are removed and another round of N/3 voting is carried out

Repeat the process and end up with one or two top ideas

Make an Action Plan

Activity Name --

End date

Task to be done	By Who	By When	How do we know it is done
Eg - Tell parents and carers the issue and complete the 3 survey questions	Eg- All of us	Eg- Friday	Eg -Surveys back in school

Example

Feed back

- Send us your ideas and plans for action – big or small -
