BIO

Chemical engineering helped me see waste as a resource and explore new ways of doing things that are good for people and planet. I work with communities, business and governments. I have found sustainable ways of making soaps and bio-fuel. Analysing and solving problems with waste can be done on any scale and has taken me all over the world.

Q.

What would you change in your school to help make it waste free?

SU

Sustainable

Cleo Lake

OUT of many we CAN do some one

I use the arts and politics to take action against injustices and climate change. I connect people through art to help change laws to protect the planet and to improve our communities. I have managed art projects as well as making art.

WAKE UP

Air pollution was harming my community so I decided to take action. I use stories, public speaking, music and writing to change behaviours and laws. I have hosted events with the famous, like Billie Eilish as well as engaging masses of young people in protests. I am in 'Bad Activists', a group seeking freedom for people and planet.

SU

Sustainable

Sandra Salazar D'Eca

I'm a 'Soil Sister'. Children who come to my farm call me Miss Dandelioness the Rasta Fairy. I teach families about growing food sustainably. I started the farm to be a role model to my son. My charity is called 'Go Grow With Love'. It is led by women and based on an African philosophy that 'remembers ancestors and plants seeds for future generations.'

Q.

Have you grown anything from seed ?

M

Medical

Aggrey Burke

My work has changed attitudes to the mental health of migrants and people from different cultures. Migrating to a new country, where some people are not supportive, damages mental wellbeing. My research showed that giving people care was far better than sending them to prison.

Researcher

Q.

What do you feel if you are left out or ignored?

M

Medical

Delores Campbell Carmen Beckford

We both looked after people in different ways. Carmen was a midwife and Delores fostered 30 children and looked after people in the community. Our main passion was for equality and integration of our Black community. We set up many ventures for housing, race relations and celebrations like the St Pauls Carnival.

Q.

Who helps you become a good citizen?

M

Medical

Tryphena Anderson

I finished school in Jamaica and boarded a ship to Britain. I trained as a nurse and, after I had my first baby, I decided to train as a midwife. Buying a nursing home following 30 years working in the NHS was a big step for me. When I was 18 I decided to dedicate my life to caring for others, which was a great decision.

Q.

What one thing would you want to achieve in your life?

M

Medical

Laura Serrant

I am a professor and an expert in healthcare. I studied for a Masters Degree while working as a nurse. It was tough when some patients refused to be touched by a Black nurse, I specialised in sexual health when the HIV pandemic struck. My science research went on to change social attitudes and health-care policy.

F

Future 1

Imani 'Imagines'

I am a surgeon. When I was young I was the one who said "a little bit of blood can't scare anyone". At school I was good with my hands, maths and science. I play basketball in my spare time for a team at the top of the local league. I don't have time to be a professional basketball player as I'm busy doing operations in the hospital.

Dylan 'Imagines'

Job details

I design specialist buildings for music, performance and recording. I was first interested in architecture as there never seemed to be enough homes in Bristol. I liked computers, understood CAD, played music and all of this combines in my job as a sound engineer.
