

Aviation Days for Schools

Day workshops exploring scientific principles and the history of aviation. Inspiring children to think about themselves as a future engineer or scientist.

* Workshops led by specialists with a team of aerospace industry, engineer ambassadors.

* Teaching resources to follow up the learning.

Pupils design build and test gliders and powered radio controlled aircraft in their school hall or gym.

* Optional after school 'Air-show' staged by pupils for parents.

Rolls-Royce

A British Science Association programme

Supported by Business sponsors and volunteers, keeping workshops affordable

"There was so much learning going on through such a fun and focused day..both on the knowledge and technical side, but also the confidence building, team building skills, speaking in front of a large unfamiliar audience...I could go on and on."

Backwell School parent

"Thank you for the fantastic experience. The students (and staff!) had an absolutely brilliant time with your volunteers and got a huge amount of enjoyment...and learning... out of the day. You've helped to provide a lot of inspiration. The enjoyment of the day shines through their faces."
