

Push and pull forces on prehistoric migration

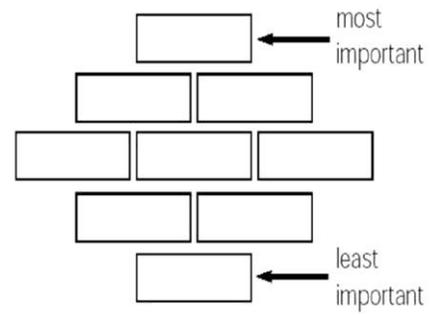

Humans established themselves in East Africa 200,000 years ago **and migrated across the world**. Present this map. It may have been seen before in the unit on migration. If so use it to recap.

Push and Pull – Pupil Worksheet – Prehistoric Migration

Activity - Why did the prehistoric people decide to leave East Africa?

Print and cut up the cards work as a team to organise the cards in what your team thinks is the priority order using a 'Diamond Format'

Push and Pull – Pupil Worksheet – Prehistoric Migration

Homeland became an unpleasant and they wanted something new and unknown	There were no jobs	News skills and tools
Terrible political circumstances after an election	Climate made places into huge ovens or freezers where barely anything can live or grow	Nomadic Lifestyle
A natural disaster	Competition with hostile neighbouring groups	Adventure and exploration – people who feel they need to take risks
Food and other resources run too low to support the amount of people within an area	Their mobile food (herds of herbivores) migrated first and they followed	Inventiveness and cooperation
Better climates	Greener lands	

Push and Pull – Pupil Worksheet – Prehistoric Migration

Which of the cards are not relevant to pre-history but could be relevant to history?

Answer

Which of the priorities pushed people?

Answer

Which of the priorities pulled people?

Answer

Divide the cards into two groups -

- Factors that Push
- Factors that Pull

What are the factors that pulled or pushed that could be added from more recent history?

Answer
